

# IDL Company Profile

**As the Market Leading Manufacturer of the World-renowned fastlane® range of Entrance Control, Integrated Design Limited (IDL) has grown organically since inception in 1985. A member of the British Security Industry Association with a commitment to Quality, Innovation and Customer Service. Certified ISO9001:2008 Approved Quality Standard.**

THE QUEEN'S AWARDS  
FOR ENTERPRISE:  
INTERNATIONAL TRADE  
2009

Integrated Design Limited specialises in the design, manufacture and marketing of Entrance Control products. Through intensive research and development, a range of standard products has evolved which offer innovative solutions to many of today's most common security dilemmas. Our **fastlane®** Entrance Control range is exported across the world through a network of Distributors, Systems Integrators and Installers.

## History

Since establishment during 1985, IDL has been designing and manufacturing solutions combining electronics and software. Since then the company has grown to be an influential force in the design of integrated systems and the manufacturer of market leading products for the Security and Facilities Management industries.

## Expertise

Experience gained in the design of unique systems and integration of electronics and software means IDL is at the forefront of systems design. In depth expertise in Infrared technology has led the way to highly accurate monitoring and guarding of entrance ways.

## Investment in Design and Development

The dynamic nature of the markets in which IDL operates demands the constant review of products and services it supplies. IDL has a commitment to reinvestment in design and development with a dedicated product development and technical services team.

## Products and Services

IDL supplies a range of innovative manufactured products encompassed in the award winning **fastlane®** brand, many of which are unique or offer unique features. IDL provides customisation along with system design and integration, consultancy and project management services.

## Quality

IDL operates a Quality Management System that meets the ISO9001:2008 International Standard for our design, development, and manufacturing activities. The scope of our registration also includes the provision of technical services. All products are CE marked in accordance with the relevant Electro-Magnetic Compatibility, Low Voltage and Machinery European Union Directives.

## Commitment to Service

IDL is committed to customer satisfaction, providing top quality solutions supported by the highest quality service. From the range of standard manufactured products to customised system design, emphasis is placed on consultation to fully understand the customers' needs. Only then can a suitable system be supplied, supported by our warranty and maintenance services.
